

## TECHNICAL DATA SHEET

### DISTE with insert

<b>Description</b>	Stair nosing profile with anti-slip safety insert for tiled floors
<b>Reference</b>	DISTE 11106 – DISTE 11107 – DISTE 11109 – DISTE 11110 – DISTE 11113
<b>Material insert</b>	Quartz / PVC
<b>Colour insert</b>	Neutral black (06), Charcoal grey (07), Rich brown (09), Putty (10), Mid grey (13)
<b>Material</b>	Stainless steel (V2A/304)
<b>Surface</b>	Natural
<b>Color</b>	silver
<b>Length</b>	250cm
<b>Height</b>	11 mm
<b>Visible width</b>	25 mm
<b>Width insert</b>	13 mm
<b>Weight</b>	0,454 kg/m
<b>Slip resistance class</b>	R 10/ V6
<b>Use</b>	Indoor and outdoor
<b>Picture</b>	 <p>with insert 13 mm</p>

**DISTE 11106**

**DISTE 11107**

## TECHNICAL DATA SHEET

### Stainless steel (V2A/304)

Steel is mechanically very sturdy. It is especially highly resistant to most chemical products or dilute acids and alkalis. Avoid contact with hydrochloric acid or non-alloy steel tools. When cutting stainless steel, make sure the saw blades or cutting discs are new and remove all dust and shavings immediately to prevent patches of corrosion. For elastic junctions, only use neutrally bonding silicone adhesives (to prevent risk of corrosion). For certain cases profiles made of 316 steel are available (with higher resistance to corrosion).

### **Note**

The suitability for use in terms of mechanical and chemical resistance must always be checked in each individual case. When installing and grouting our metal profiles, the adhesive and grouting materials must be removed immediately with clean water and a soft sponge to prevent damage due to corrosion of the profile. Do not use acidic (e.g. cement fog remover) or alkaline cleaning agents in combination with all metal profiles. Clean with clean water and wipe with a dry linen cloth.
