WITH DRIP EDGE
AND DRAINAGE
OPENING**

**BALCONY ANGLE PROFILE
ESPECIALLY FOR THE FINISH
OF SUPPORT-BASED
INSTALLATIONS**

**HEIGHT-
ADJUSTABLE
BOUNDARY
PROFILE**

DURABAL ST

Two-part, height-adjustable boundary profile

For terrace and balcony surfaces with installation heights of 30 to 120 mm

Height-adjustable | Internal drainage

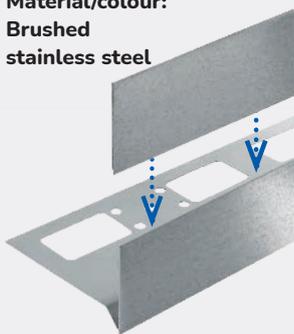

Material/colour:
Brushed stainless steel

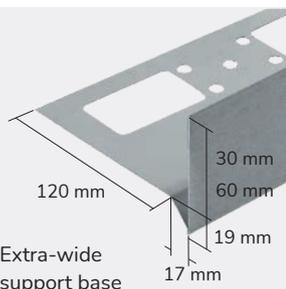

For terrace and balcony surfaces, façade recesses and pavements with installation heights of 30 to 120 mm. V4A brushed stainless steel (316). Also use as a gravel strip or for paving. Profile length: 250 cm

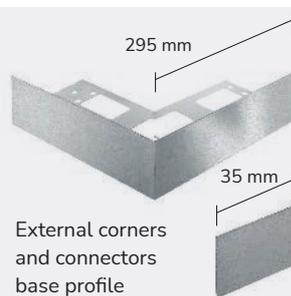

Internal drainage

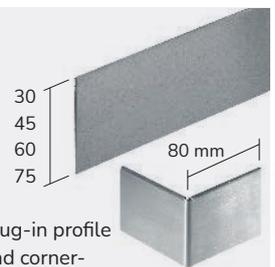

Height-adjustable plug-in profile and base profile

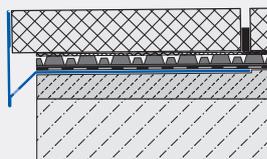

Extra-wide support base

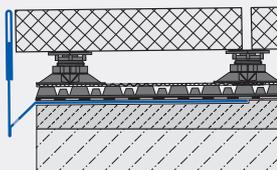

External corners and connectors base profile

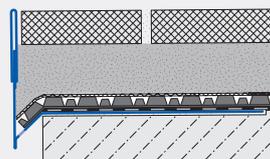

Plug-in profile and corner-plug-in profile

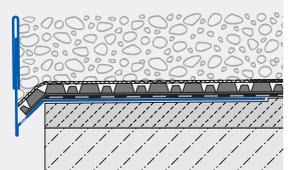

Direct installation without plug-in profile

Installation on supports with plug-in profile

Installation in drainage mortar/gravel/chippings with plug-in profile

Installation as a gravel strip with plug-in profile

DURABAL BK

Balcony angle profile with drip edge for installation in thin-bed mortar

Elegant cladding of the substructure

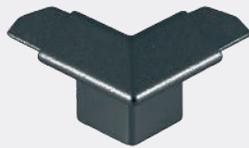

2 profile variants: Panel height 18 and 60 mm

Long-lasting high quality appearance

For covering thickness of 9, 11 and 13 mm

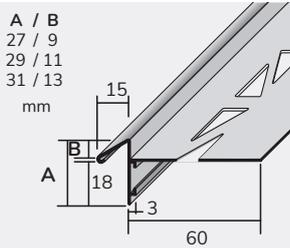

Material/colours:
Aluminium
silver anodised
powder-coated
RAL 7016 anthracite

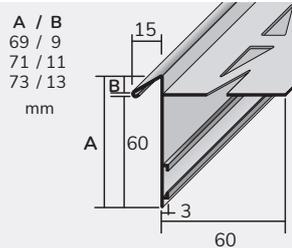

Elegant and flexible finishing profiles from aluminium with integrated drip edge. The areas of application are tiled balconies and terraces where surface coverings are installed using the thin-bed mortar method. The different heights adapt to any surface thickness.

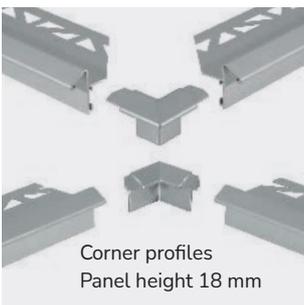

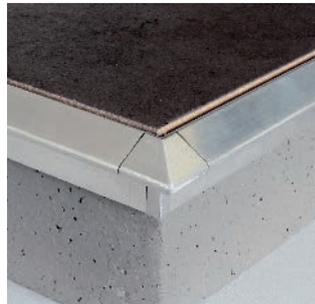

Profile length: 300 cm

Panel height 18 mm

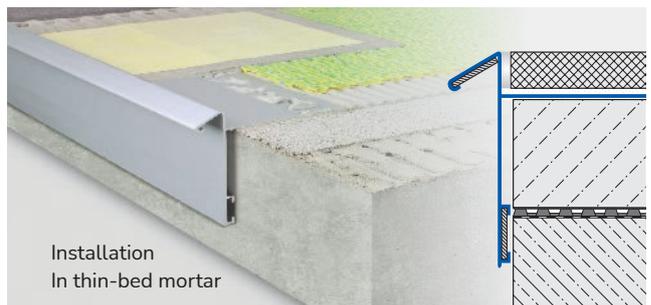

Panel height 60 mm

Corner profiles
 Panel height 18 mm

Corner profiles
 Panel height 60 mm

Installation
 In thin-bed mortar

DURABAL BT 11

Balcony corner profiles with drip edge and drainage opening

Elegant finish for higher installation heights too

For thin covering layers up to 11 mm, for example split mortar flooring

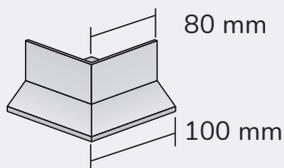

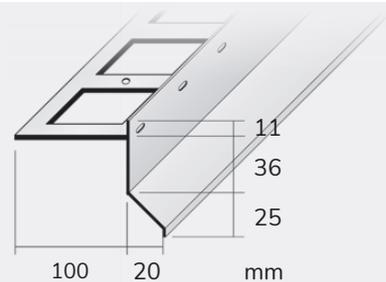

Material:
Aluminium

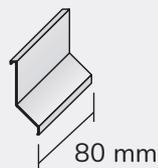

Colours:
silver anodised
powder-coated
RAL 7016 anthracite

DURABAL BT 11 is a balcony angle profile with drip edge for the elegant finish of open peripheries of flooring structures in conventional mortar. Thanks to the various RAL tones available, it harmoniously blends in with the complete image. The support base is additionally drilled for easier installation.

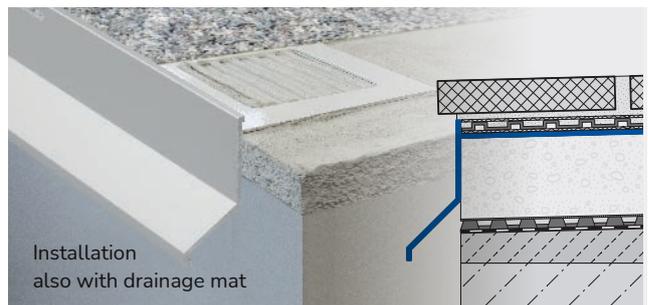

Profile length: 300 cm

External corner
with drip edge

Connector
with drip edge

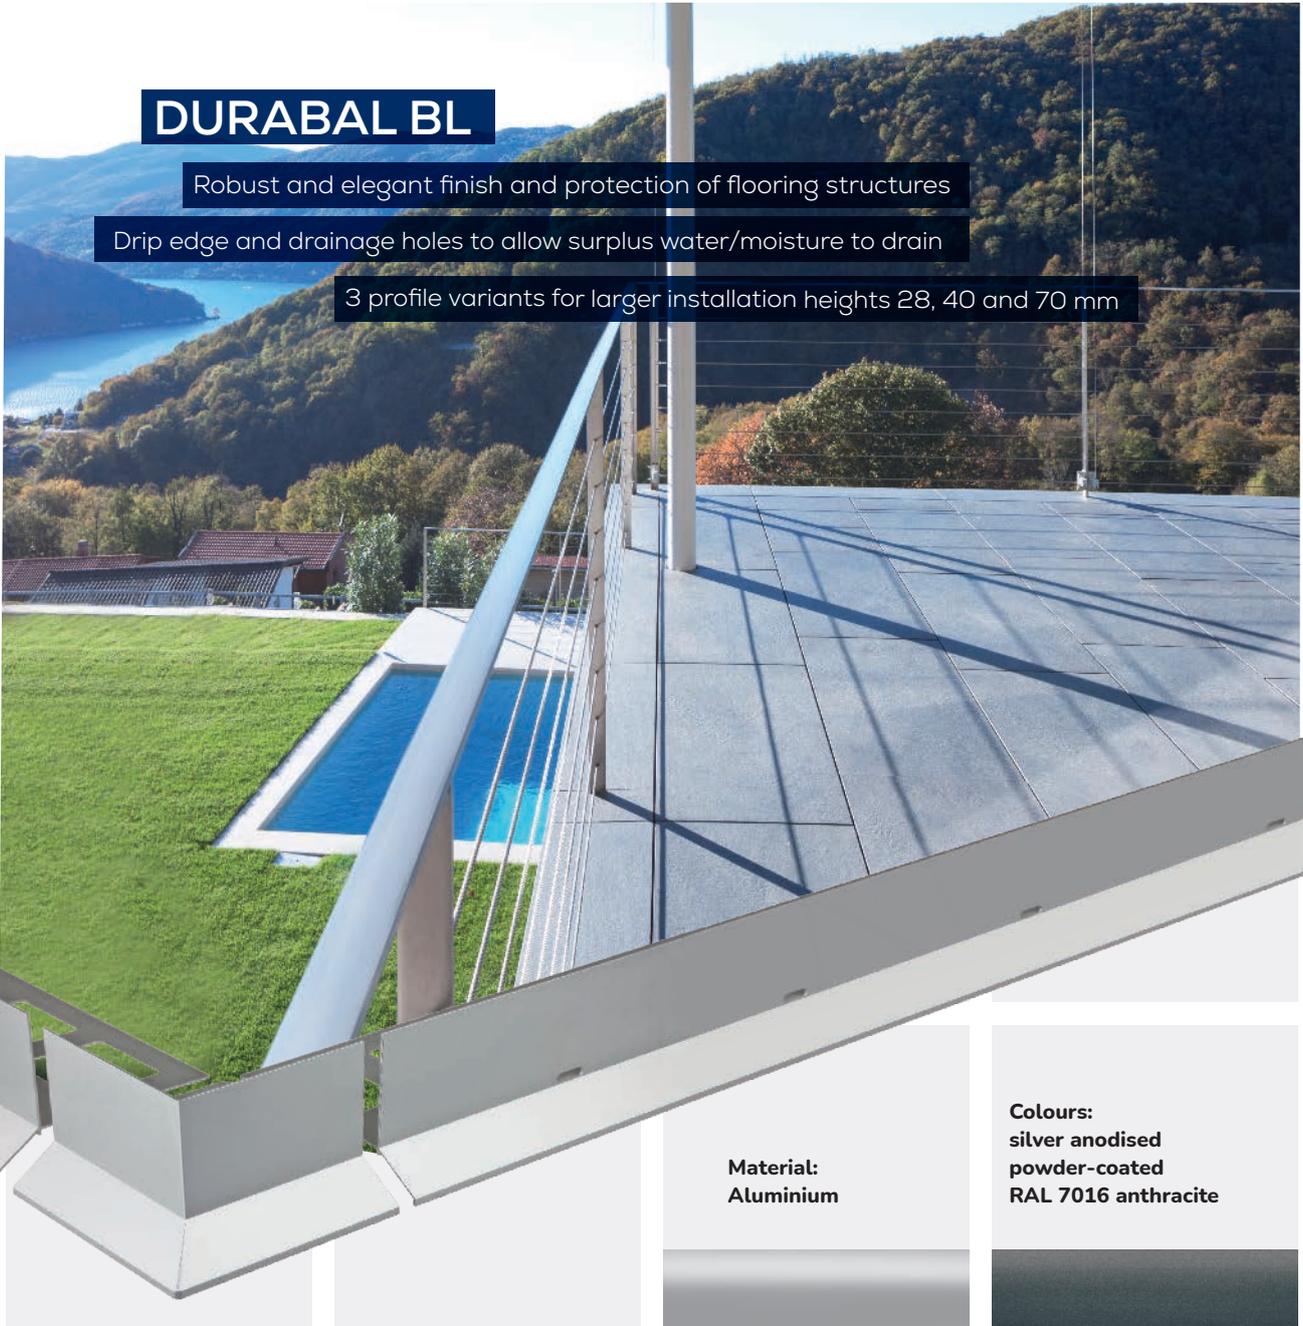

DURABAL BL

Robust and elegant finish and protection of flooring structures

Drip edge and drainage holes to allow surplus water/moisture to drain

3 profile variants for larger installation heights 28, 40 and 70 mm

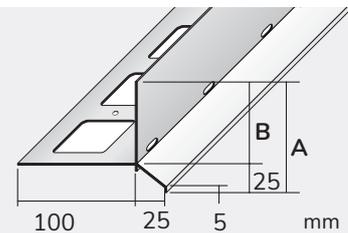

Material:
Aluminium

Colours:
silver anodised
powder-coated
RAL 7016 anthracite

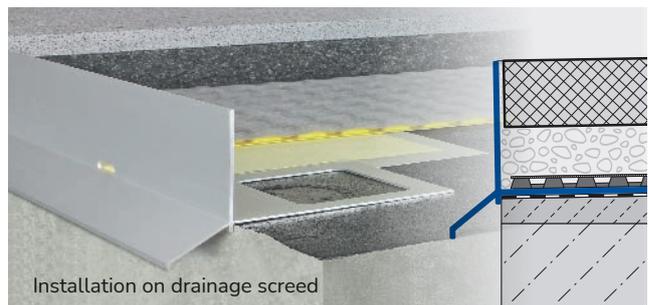

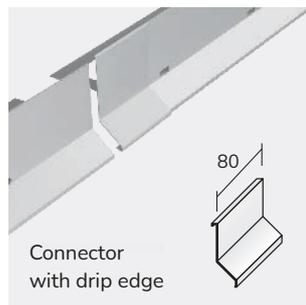

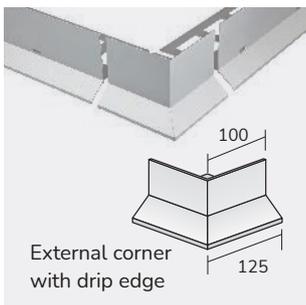

The areas of application for DURABAL BL include tiled balconies and terraces, where surface covering is installed on gravel or crushed-stone beds, on drainage screed, on supports or directly on drainage mats. Drainage slots guarantee trouble-free secondary drainage and therefore prevent the formation of water logging within the flooring structure. Support base additionally drilled.

Profile length: 300 cm

A / B
53 / 28
65 / 40
95 / 70
mm

3 profile variants for different installation heights
28, 40 and 70 mm
